WARNINGS AND LIMITATIONS
Safety Eyewear conforming to EN 166:2001
– see Packaging for Model Reference
A. Particular attention should be given to warning statements where indicated.

WARNING
Always be sure that the complete product is:
- Suitable for the application
- Fitted correctly.
- Worn during all periods of exposure.
- Replaced when necessary.

To reduce the risks associated with eye hazards which, if not avoided, could result in serious injury or death - Inspect eyewear before each use. Replace immediately if there is any sign of damage including scratched lenses. If in doubt, check with the manufacturer.
For the risks against which the eyewear is intended to protect the product markings.
Eyewear may log in certain environments: if fogging occurs, stop task or operation. When safe to do so, exit area and contact supervisor.
Proper selection, training, use and appropriate maintenance are important in order for the product to help protect the wearer.
Always use both hands to put on and remove eyewear.
Ensure eyewear fits securely; minimize gaps; eyewear is not easily dislodged.
Never alter or modify the product.
Failure to follow all instructions or the use of these personal protection products and/or failure to properly wear the complete product during all periods of exposure may adversely affect the wearer's health, lead to severe or life threatening illness or permanent disability.
Materials which come into contact with skin may cause allergic reactions in susceptible individuals.
Eye protectors against high speed particles worn over standard corrective spectacles may transmit impact energy, creating a hazard to the wearer.
Filter frame and lens markings for EN 166 compliance: 3 = liquid droplets
If protection is required at extremes of temperature then select safety eyewear with the letter T immediately after the impact letter, e.g. FT or BT.
If the impact letter is not followed by the letter T then the eye protector shall only be used against high speed particles at room temperature.
Molten metal splash protection is indicated by the number 9 in the marked lens.
Spare parts / accessories are only available for certain models where a separate sheet with details and fitting instructions is included.
For suitability and proper use follow the requirements set out in all information supplied or contact a safety professional 3M representative.
See all instructions for use and care for continuing reference.
Eliminate contact lens wearers when exposed to dusty and molten metal environments.
Other components are not made from natural rubber latex.

CLEANING AND DISINFECTION
Eyewear should be cleaned using soap and water or 3M™ Lens Cleaning Solution. Dry with a soft cloth or tissue. For disinfection instructions please contact 3M.

STORAGE AND TRANSPORTATION
Follow the manufacturers recommendation for storage.
Maximum/Minimum Humidity: ☂ Temperature Range: ⁻⁺°C Date of manufacture (mm/yyyy)
See package for details Discard the product within 5 years from the date of manufacture or immediately if damaged. When transporting this product use original packaging. Store in original packaging and keep away from abrasives, solvents or solvent vapours. Packaging not suitable for food contact Dispose in accordance with local legislation

MARKING
A – Frame Marking
1 - Manufacturer (3M)
2 - Number of the standard EN 166
3 - Fields of use
3 = Liquid droplets
4 = Large dust particles
5 = Gas and fine dust (<5µm)
8 = Short circuit electric arc
9 = Molten metals/hot solids
4 - Mechanical Strength (high speed particles,
F = low energy impact, B = medium energy impact)
5 - Designed for small heads
6 - Highest scale number compatible

B - Lens Marking
1 - Filter Code Number (2 or 2C = Ultraviolet,
4 = Infrared, 5 = Combined UV and IR protection,
8 = Sunglares with IR protection)
2 - Shade number (without code number = welding filter)
3 - Manufacturer (3M)
4 - Optical Class
5 - Mechanical Strength (see frame marking)
6 - Fields of use
8 = Short circuit electric arc
9 = Molten metals/Hot solids
10 = Resistance to surface damage by fine particles
N = Resistance to fogging

Standard and Approval:
These products meet the requirements of EN 166:2001 Check product marking for further information on intended use. These products are type approved by either: ECS GmbH - European Certification Service, Huettelbloxer 50, 73430 Aalen Germany (Kennzeichnung ergänzt durch Kennziffer "7" bedeutet Erfüllung der erweiterten Anforderungen) or 3M Deutschland GmbH, Carl-Schurz-Str. 1, 41453 Neuss, Germany (Kennzeichnung ergänzt durch Kennziffer "7" bedeutet Erfüllung der erweiterten Anforderungen) or 3M United Kingdom PLC, 3M Centre, Cain Road, Bracknell, RG12 8HT, UK (Notified Body number 0086).
