1

Diagram 1 illustrates the preparation of the bucket. A bucket is shown being filled with water from a tap. A clock icon indicates a 15-second wait time. A warning icon shows the bucket should be turned on and then off. A final icon shows the bucket with a 'OFF' label and a crossed-out flame, indicating it should be turned off and not used for fire.

5

Diagram 5 illustrates the step of mounting the horizontal bar to the wall. The main image shows the bar being attached to a wall grid. Two circular callouts provide details: one shows a hand inserting a pin into a hole in the wall, and the other shows a hand tightening a nut on the end of the bar. A callout labeled '30' indicates the size of the nut.
