Dear sales partner

**Energy consumption labeling according to
Regulation 2019/2015 / EU**

30.08.2021

VL-re

Start date in retail: 09/01/2021 / 03/01/2022 (surrounding products)

Dear sales partner,

In the past we all knew the clear distinction between light source (bulbs) and lamp visually different labels.

With the new regulation of labeling, only one label for "light sources" will be used in the future. Then, a product falls into either the "light source" or "surrounding product" category.

A "surrounding product" can be a lamp, a cabinet or a mirror.

After consultation with the ZVEI (Central Association of the Electrical Industry) and the VDM (Association of German furniture industry), our light-emitting sales items fall into the group "surrounding product".

For the category "surrounding product" there won't be any label with the start of regulation 2019/2015/EU. All that is required is the amount and efficiency class of the installed light source to be named in the product documentation.

The Pelipal Group will of course meet these requirements.

Within the fourth quarter of 2021, a customer-friendly QR code will be available on the article label to get the required information online.

Pelipal GmbH
Hans-Wilhelm-Peters-Straße 2
33189 Schlangen

Telefon +49 (0) 5252 848-0
Fax +49 (0) 5252 848-118
www.pelipal.com

In addition, from the specified time onwards, we will provide order-related information about a direct access on our website.

Should we also sell "light sources" in the future, a corresponding label will be placed on the packaging and will be available electronically.

The domain (URL) on our homepage will be:
<https://www.pelipal.de/Service/Downloads/Energieeffizienz/>

In case of any further questions we will be at your disposal.

Best regards

Pelipal GmbH
