Spectral power distribution in the range 250 nm to 800 nm. at full-load	 The graph displays the spectral power distribution (SPD) of the light source. The x-axis represents the wavelength in nanometers (nm), ranging from 200 to 800 nm. The y-axis represents the relative power, ranging from 0 to 1.0. The curve shows two distinct peaks: a sharp peak at approximately 450 nm with a power of about 0.9, and a broader peak at approximately 600 nm with a power of about 0.8. The power is near zero for wavelengths below 400 nm and above 700 nm.
