This diagram illustrates the process of attaching a vertical pole to a corner bracket. The pole, labeled 16, is shown being aligned with the corner bracket, which is labeled 7. A pencil is shown marking the pole at the point of attachment. A detail view at the bottom right shows the corner bracket (8) being secured to the pole with a screw. The distance from the corner of the bracket to the center of the screw hole is indicated as 13mm.

24

This technical diagram illustrates the assembly of a corner bracket (8) for a cabinet. The assembly is shown in two parts: a side view and a top-down view. In the side view, the bracket (8) is attached to the side panel (46) using a screw (62) and a washer (60). A vertical rod is shown passing through the bracket. In the top-down view, the bracket (8) is shown being secured to the corner of the cabinet frame (44) using two screws (46). A dimension line indicates that the screws should be 2 x Ø 3mm and 25mm long. A warning symbol indicates that the screws should not be used in a material with a thickness of 8mm or less, or a depth of 50mm or less. The diagram also shows a cross-section of the cabinet frame (44) and a warning symbol indicating that the screws should not be used in a material with a thickness of 8mm or less, or a depth of 50mm or less.
