

SCS Indoor Advantage™ Gold

The **SCS Indoor Advantage™ Gold certificate** states a test regarding harmful emissions of fabrics and products in the interior.

Fabrics certified by SCS contribute to a better room air quality. The certificate ensures that all JM Commercial Collection fabrics are certified according to the below standards and do not exceed the specified limits. It is comparable to **Greenguard certificate**.

The certification by **SCS Global Services** is based on the testing of emissions according to **Californian Standard CDPH Standard Method v1.2 (CA 01350)**. This standard is used internationally and acknowledged by most building certifications (**LEED, BREEAM, WELL**).

In Europe, **DIN EN ISO 16000-9 (new: DIN EN 16516)** states a comparable test on which **DGNB** and **BREEAM** are based on.
