15 YEAR Guarantee*

EN *WARRANTY: It applies from the date of purchase and covers only the value of the product, excluding installation and removal costs. EXCLUSION OF WARRANTY: defects visible before installation (installation is considered acceptance), gradual, progressive or foreseeable wear and tear of the plastic floor, unsuitable uses of the product (parts excluded by the instructions, outdoor or wall installation, interior space of the shower, unheated, secondary residence) or outside the authorised temperature range, defects related to non-compliance with installation rules, or visible before installation, or resulting from accidents (water damage, falling objects, moving objects generating scratches, unsuitable product or maintenance material). The water resistance guarantee can only be claimed with the use of a peripheral waterproofing kit (foam joint filler and MS Polymer mastic protection). INSTALLATION AND USE INSTRUCTIONS: This product is intended for indoor and insulated rooms. A glued installation is recommended in case of risk of exceeding the authorized temperature range of use (10°C to 35°C). The maximum authorised laying area is 200m², and the maximum length is 15 metres. Beyond this, a 12mm split is required. If an underlayment is added, it must be suitable for PVC tiles and boards. A laminate or parquet underlayment is not suitable. The underfloor heating must be turned off 48 hours before levelling and turned on again gradually 48 hours after laying the floor covering in increments of 5°C per 24 hours. Authorized surface type: nailed wood surface with mandatory fiber patching, concrete screed with patching, patched tiles if joints are greater than 4mm wide and 2mm deep. For a harmony of colours, contents of the packages must be mixed. For washing, use a wet mop with a cleaning product suitable for PVC floors (no washing with water). An unsuitable product can damage the surface and cause dirt to stick to it. Do not use rubber-backed or latex mats: they may leave marks. A protective mat must be used under a chair with casters. Protect the feet of chairs and furniture with glides adapted to PVC floors.

ÉMISSIONS DANS L'AIR INTÉRIEUR* A+ (A+ A B C)

FR *Information sur le niveau d'émission de substances volatiles dans l'air intérieur, présentant un risque de toxicité par inhalation, sur une échelle de classe allant de A+ (très faibles émissions) à C (fortes émissions).
