COPPER PIPES – ACR PRESSURE

Copper pipe specification

Alloy: Copper Cu DHP 99,90 min.
Total residual: < 0,38 mg/dm²
Inside surface smooth and bright.
Physical state: annealed (R220)
Excellent resistance to corrosion.
Suitable for gas R407C, R410A e R32

In compliance with the specific customer's requirements, pipes can be produced according to different standardized regulations or with different diameters, wall thicknesses and lengths, once the technical feasibility has been verified.

Packaging

Coils 25 or 50 meters (20 m for the double) individually wrapped in film.
Each coil has an identification label with product name, dimensions and length.
Pipes with flattened ends.
