10 YEAR Guarantee*

...product is intended for indoor and insulated rooms. A glued installation is recommended in case of risk of exceeding the authorized temperature range of use (10°C to 35°C). The maximum authorised laying area is 200m^2, and the maximum length is 15 metres. Beyond this, a 12mm split is required. If an underlayment is added, it must be suitable for PVC tiles and boards. A laminate or parquet underlayment is not suitable. The underfloor heating must be turned off 48 hours before levelling and turned on again gradually 48 hours after laying the floor covering in increments of 5°C per 24 hours. Authorized surface type: nailed wood surface with mandatory fiber patching, concrete screed with patching, patched tiles if joints are greater than 4mm wide and 2mm deep. For a harmony of colours, contents of the packages must be mixed. For washing, use a wet mop with a cleaning product suitable for PVC floors (no washing with water). An unsuitable product can damage the surface and cause dirt to stick to it. Do not use rubber-backed or latex mats: they may leave marks. A protective mat must be used under a chair with casters. Protect the feet of chairs and furniture with glides adapted to PVC floors.

ÉMISSIONS DANS L'AIR INTÉRIEUR* A+ (A+ A B C)

FR *Information sur le niveau d'émission de substances volatiles dans l'air intérieur, présentant un risque de toxicité par inhalation, sur une échelle de classe allant de A+ (très faibles émissions) à C (fortes émissions).
